SUPPORT SERVICES GOALS

3000.1

Support services are essential to the successful function of a school system. Management of auxiliary operations is, therefore, an important responsibility of the school administration. It should be remembered that education is the system's central function, and all support services shall be provided, guided and evaluated by this requirement.

In order to provide services that are supportive of the educational program, the Board establishes these broad goals:

to provide a physical environment for teaching and learning that is safe and pleasant for students, staff and the public;

to provide for students' safe transportation to and from school;

to provide students with nutritious meals in the school lunch program; and

to provide resources and assistance when appropriate to meet the needs of the educational program.
