

## HEALTH SERVICES

### **5151.**

The School Health Program, in providing health services, is responsible for all aspects of school health, including mental, dental and environmental health.

The goals of the Program are as follows:

- Facilitate access to primary health care
- Provide a system for handling crisis medical situations
- Provide systems for identification and follow through of students' health and educational needs
- Provide comprehensive and appropriate health education
- Provide a healthful and safe school environment that facilitates learning
- Provide a system of evaluation of the effectiveness of the school health program
